Understanding the Circular Economy in Community Regeneration.

The picture can't be displayed.

What could communities do?

1. Using waste to create local value

2. Reducing single use

3. Reducing consumption in your community

4. Tackling food waste at a local level

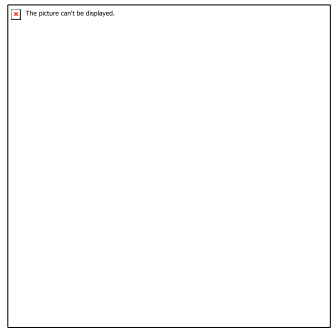

5. Creating sustainable opportunities for the local economy

6. Creating sustainable places

7. Running sustainable events

Key Takeaways

- Regeneration First
- Keep Value Local
- Deliver Multiple Outcomes
- Build on Local Strengths
- Keeping value in place.

Thank you

Circular economy is not the outcome we are seeking. Thriving, resilient communities are.

Circular approaches are simply one of the tools that can help us get there.
